Cohort distributions (n = 1,489 patients)
all patients
Patients
Age (years)
measured only, 18 excluded
Weight (kg)
measured only, 398 excluded
Height (cm)
measured only, n=1089
BMI (kg/m²)
all patients
52% pinned
at lower bound
Calibrated EC50 (μg/mL)
zeros included
Mean propofol rate (mcg/kg/min)
all patients
Prediction instances per patient
imputation artefact
Measured (n=1091)
Imputed 170 cm (n=398)
Height (cm), as seen by the models
